<b>Website</b>	<a href="http://www.bucklandbuses.co.uk">www.bucklandbuses.co.uk</a>

## Short description

Buckland Omnibus is a Coach operator handling School Contracts, Private hire, Vintage Coach Hire, Weddings, etc.

## Environmental highlights

Implementing an Energy Report and Action Plan. 90% of our energy use is fuel. We already keep comprehensive mileage and fuel consumption records for our vehicles but since the Energy Report we have endeavoured to look more closely at vehicle performance on each journey.

## Green credentials

After our first audit from implementing the Action Plan we have recently been awarded the Suffolk Carbon Charter at Bronze Level.

## A summary of environmental achievements

We initially asked for an energy report from the Business Energy Advisor at Suffolk Coastal District Council with some scepticism as we did not expect our type of business to be anywhere near environmentally friendly. After spending an hour with our Advisor we were left feeling so positive. We found that our general practice of the business with detailed fuel consumption records, endeavouring to attract local business and schools to reduce wasted mileage and our good attitude to target minimal waste left on vehicles was already a start to our 'green credentials.' After receiving the report and action plan we found that in our own small way we could further improve all round and work towards even small targets to make a difference. It has really been an uplifting experience and then to be awarded the Bronze Carbon Charter Mark - who knows we may hit Silver next year!
