## Short Description

Concierge Couriers Ltd specialises in providing same day courier services throughout the UK and to Europe. Our aim is to be a leading edge provider for urgent Same Day delivery solutions - utilising motorcycles to their maximum advantage.

## Environmental highlights

Achieving Bronze 'status' within the Suffolk Carbon Charter program

## Green credentials

Suffolk Carbon Charter - Bronze level

## A summary of environmental achievements

Concierge Couriers Ltd is probably the ONLY motorcycle courier company in the UK to have achieved an 'environmental' award / recognition. I believe we now have a better understanding how we might achieve a realistic 'carbon balance' with our activities and a more sustainable business model in the longer term. Additionally it provides an opportunity for greater engagement with our customers, suppliers and wider audience in general.

## Personal testimony

I think it was a very good program, of which companies of any size and business activity would benefit from. Very practical and realistic.

## Key lessons

The whole program was key. Might be good to have possible review mechanism possibility with 3rd party (not just an internal audit)

## Where did I get my advice

Mainly through Groundwork and Green Light Trust organisations
