<b>Business Size</b>	5 Employee's
<b>Website</b>	<a href="https://www.suffolklatchcompany.co.uk">https://www.suffolklatchcompany.co.uk</a>
<b>Contact</b> <i>Please add your preferred contact (if any) for use on our website</i>	Carl.benson@suffolklatchcompany.co.uk

### 1. Short description of the business (guideline 50 words)

We are a micro business based in the market town of Clare Suffolk. We specialize in the supply of traditional hand forged ironmongery through our website <https://www.suffolklatchcompany.co.uk>

### 2. Green credentials (any awards etc.)

We are new to this world, and were very please to have been recently awarded a Silver Level award from the Carbon Charter. This was in recognition for the works carried out recently with in our facility in Clare as well as our commitment to operating in a paper free environment.

### 3. Key lessons – what would you do differently? What has worked well?

We believe that with minimal effort you can make a considerable difference to your carbon impact, this can be simple as walking or cycling to work. As a company we generate spare revenue each year, at the end of our tax year in April 2018 we intend to invest in solar panels and batteries storage, this should in effect take us off the grid entirely.

**4. Where did I get my advice? Any sources of support you found particularly helpful.**

We had great advice and support from BEE Anglia.
