Creating the Greenest County

# West Suffolk Solar for Business

## What is it?

---

West Suffolk Solar for Business has been set up to help you use an unrealised asset – your roof.

By generating electricity on your roof West Suffolk Solar for Business can help you cut your energy bills at no cost or hassle to you.

## How is it hassle free?

---

We plan, finance, install and manage the solar installation. The installation is a relatively simple and quick process. Once installed, we will monitor and maintain the performance. The installation will be completely financed by us, so there will be no set up or running costs for you the business.

## What do I get from West Suffolk Solar for Business

---

100% of the electricity generated from the system is available for you to use at a discounted tariff cheaper than your current supplier.

You also reduce your carbon footprint by using renewable energy generated on your site.

## What are others saying?

---

Denny Bros Ltd is a family owned business established in 1945. In 2014, they installed 50kWp of solar photovoltaics (PV) on their Bury St Edmunds site.

Through West Suffolk Solar for Business they are now benefitting from a further 100kWp of solar, which should save them around £5,000 every year for the next 20 years. Managing Director, Graham Denny said: *“By working with the Council we know that the scheme has been well researched, installed and will generate the predicted value both for the Council and us.”*

# Who are we?

---

West Suffolk Council are working to support local businesses in West Suffolk to become leaner and greener. To do this we have launched West Suffolk Solar for Business.

# What can we offer your business?

---

With West Suffolk Solar for Business we can offer your business:

- ✓ Our excellent track record gained from developing our own solar installations and know-how for managing renewable energy projects from concept to reality
- ✓ Our stability – unlike some, we will be around to support you to become more energy efficient and save you money
- ✓ Our access to business support – we can help you access free, independent high-quality energy efficiency advice to help you make savings and cut your carbon footprint

# How to contact us?

---

You can arrange an appointment with us:

Call: 01284 757400

# Greener Suffolk Business Service

**The Councils have funding and project management support to help your business save money on its utility costs.**

We can fund renewable energy technologies such as solar PV and biomass boilers, new energy efficient lighting projects and new heating systems, in fact the fund can be used to support any measure that can demonstrate an energy saving.

This programme builds upon the success of our West Suffolk Solar for Business which has invested over £1m in the installation of Solar PV systems on the roofs of business throughout the district.

---

**Do you have an ageing and inefficient boiler that needs replacing or perhaps old dull lighting? This Council scheme could see you upgrade this equipment with no upfront capital required from your business.**

---

The Council will organise, manage and fund the installation and you payback the capital through the savings made with the new equipment.

We can also arrange for a free energy efficiency audit of your business through the Business Energy Efficiency Anglia service.

**To find out more and see how this fund could help you please contact the Council:**

**Tel: 01284 757400**

**Email: [environment@westsuffolk.gov.uk](mailto:environment@westsuffolk.gov.uk)**
