

Adaptation to Coastal Change

Bill Parker and Kellie Fisher
Coastal Partnership East

Kindly sponsored by Coastal Partnership East

Mapping Exercise

- Cliff scenario –
 - 1x small, rapidly eroding sand cliff
 - 1x large, clay landslide, episodic erosion
- Estuarine scenario
- Open coast flood scenario

Q How can the community adapt?

Mapping Exercise

Q How can the community adapt?

- **Innovative solutions welcome!**
 - **No technical, environmental or economic constraints.**

Mapping Exercise

Q **How can the community adapt?**

- **Solution must be technically, environmentally and economically feasible.**
 - **Little public funding available, you cannot build hard defences.**
 - **Environmental designations and planning law must be considered.**

Biology The process of change by which an organism or species becomes better suited to its environment.

'living in groups is an adaptation to increase the efficiency of hunting'
