

HWMP Felixstowe Peninsula gp mtg 04/10/2016

Attendees

Jonathan Thompson EA (JT)
Tim Darby ESWAG (TD)
Sarah- Jane Court Motts (SJC)
Paul Bradford Consultant (PB)
Giles Bloomfield IDB (GB)

Apologies

Jane Burch

Purpose of the meeting was to discuss and agree scope of works the project would be looking for Mott MacDonald to undertake.

- SJC had been instructed by Steve Moncaster of Anglian Water Services Ltd (AWS) that she was to help with design of a reservoir. However, the group had prepared an initial scope which was broader than just that and included pipelines and possible service reservoirs and that a wider options appraisal of the engineering options and associated costing was envisaged.
- **Action – SJC to share initial scope and confirm with SM level of support AWS able to offer.**
- It was agreed that issues around fresh water flows and eel passage would not be addressed at this stage as work ongoing.
- PB and GB went through the scope with SJC and clarified any details (such as looking at widening of the Kings Fleet or service reservoirs, pipelines etc.)
- **Action - PB to forward draft Scoping Doc to SJC**
- **Action JT to ask P Willett of EA to share Kings Fleet update work when completed. Earlier report to be send to SJC**
- **Action JT to send latest Eel screen report to GB**
- **Action JT, GB, PB, TD to review newly produced Bird survey scope (JT to discuss with Emma Hay of NE)**
- **Action – SJC to draw together a scope of works, discuss with AWS and then provide to the group in the next 3 weeks.**
- **Action -TD to provide location and quantity (incl. estimated monthly breakdown) of demand hubs. EA can provide historic monthly record of SI abstraction for catchment if required.**
- **GB to provide GIS mapping layers including level data around the Kings fleet and route of East Anglia One cable run.**
- **PB/TD to confirm any constraints at the Kings Fleet due to the Angling club**
